

Siemens Data Science Master Internship

8-Week AICTE – EduSkills Virtual Internship, Supported by Siemens

Ujjwal Kumar

B.Tech CSE | IILM University, Greater Noida

Duration: June 2026 – August 2026

Semester: 5

Organisation: Eduskills

Program: B.Tech CSE

Enrollment No.: 2410030661

About the Internship

An 8-week AICTE–EduSkills Virtual Internship in the Siemens Data Science Master domain. The program combines structured, week-wise learning with practical exposure — weekly assessments, project documentation, and a Final Assessment Test — leading to a Virtual Internship Certificate on successful completion.

Evaluation Structure

- Week-wise structured learning plan
- Weekly assessments to track progress
- Project documentation and assignments for select modules
- Final Assessment Test in the last week
- Final grade based on assessments, submissions, and the final test

Platform & Skill Tracks

Applications & Use Cases

Identifying business problems suited to AI & ML

Data Engineering

Accessing, loading, transforming, and calculating data

Machine Learning

Foundational and advanced ML model building

Data Preparation

Advanced data handling and automation

Model Deployment

Deploying and monitoring ML models

Platform Administration

Configuring and managing RapidMiner AI Hub

Delivered through RapidMiner AI Hub, the enterprise data science platform used across the Professional and Master tracks.

Learning Path – Professional to Master

The program progresses from identifying business problems suited to AI/ML, through data engineering and foundational machine learning, into master-level data preparation, advanced ML, model deployment and monitoring, and finally enterprise-level platform administration on RapidMiner AI Hub.

Week-Wise Internship Structure

Week	Module	Description
Week 1	Applications & Use Cases Professional	Learn to identify business problems suitable for AI and machine learning.
Week 2	Data Engineering Professional	Learn to access, load, transform, and calculate data.
Week 3	Machine Learning Professional	Build foundational machine learning skills.
Week 4	Data Preparation Master	Master advanced data handling and automation.
Week 5	Machine Learning Master	Learn advanced machine learning techniques.
Week 6	Applications & Use Cases Master	Deploy and monitor ML models.
Week 7	Platform Administration Master	Configure and manage RapidMiner AI Hub.
Week 8	Platform Administration Master	Enterprise-level platform operations.
Final Credential Validation / Internship Grade Point Assessment		

Outcomes & Conclusion

- Ability to identify business problems suited to AI and machine learning
- Practical skills in data engineering — accessing, loading, transforming data
- Foundational and advanced machine learning model-building skills
- Advanced data preparation and automation techniques
- Experience deploying and monitoring ML models
- Working knowledge of enterprise platform administration on RapidMiner AI Hub
- Virtual Internship Certificate on successful completion (no stipend associated)

This internship provided structured, hands-on exposure to the Siemens Data Science Master curriculum — from identifying AI use cases to enterprise platform administration.

Thank You
